

JEFFERSON STREET BRIDGE UNDERCROSSING

JANUARY 23-24 & 28-29, 2025 | 7:00 A.M. - 7:00 P.M.

The Coachella Valley Association of Governments (CVAG) is nearing completion of CV Link and construction crews will be paving the concrete pathway along the top of the Whitewater River Stormwater Channel levee on both sides of the Jefferson Street bridge.

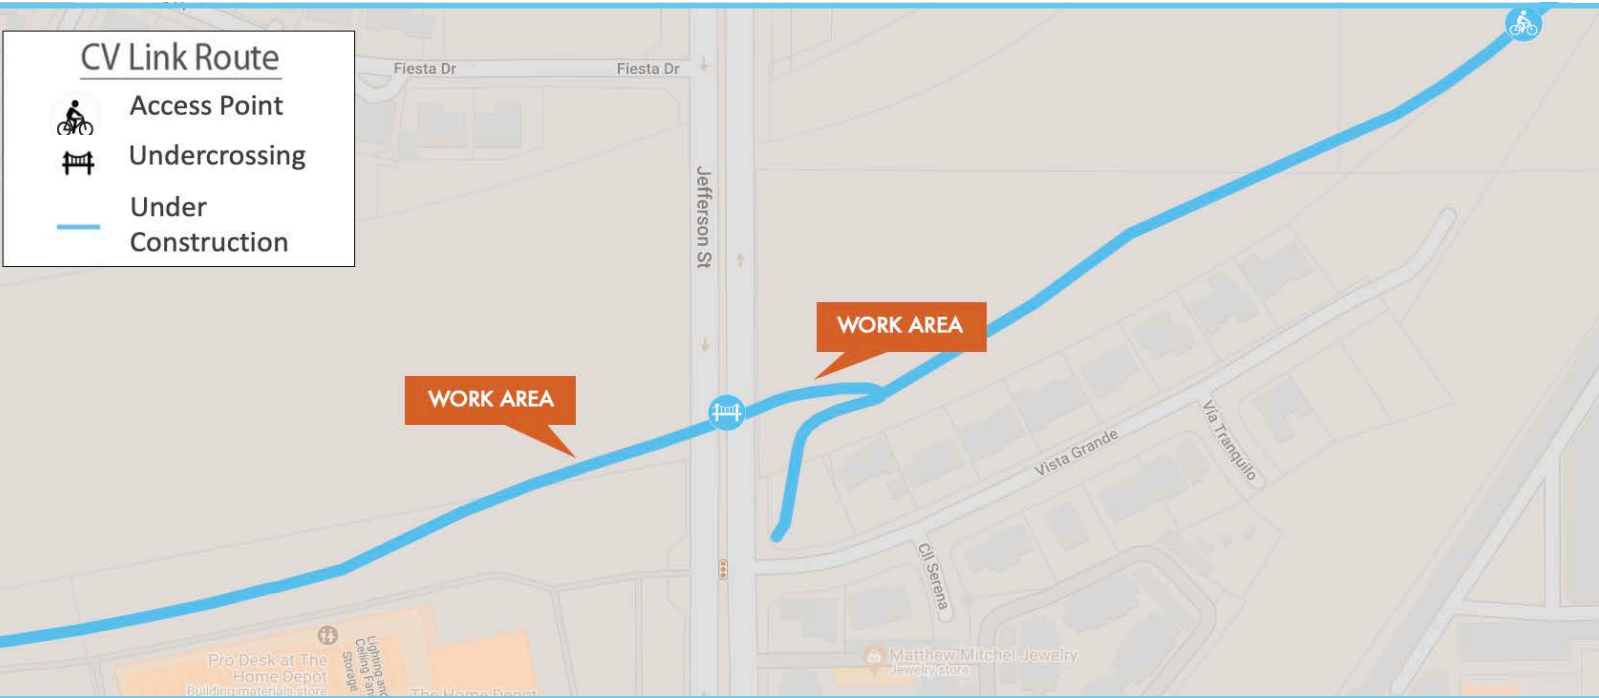

CV Link is a 40-plus mile pathway that is being built across the Coachella Valley to provide a safe route to walk, run, bike or use low-speed electric vehicles, such as golf carts. CV Link is expected to provide significant environmental, public health, and economic benefits to generations of current and future residents and visitors to our valley.

WHAT TO EXPECT

Noise & Vibrations – Residents and businesses near the channel may experience periodic construction related noise or vibrations. Crews will be paving during the day and saw cutting in the afternoon/early evening. Construction activities such as soil compacting, excavations, moving heavy machinery, etc., can cause ground borne vibrations that can physically be felt by neighboring properties.

Every effort will be made to minimize any disturbance to the community. Please contact us with any questions or concerns. We appreciate your cooperation throughout this project. Due to the dynamic nature of construction, note that all dates and times are subject to change due to unforeseen operational factors or inclement weather.
